

# Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

## TABLES AND LISTS

 Lists do not contain only `<li>` elements and script supporting elements (`<script>` and `<template>`). 

These are opportunities to improve the experience of reading tabular or list data using assistive technology, like a screen reader.

## NAVIGATION

 Heading elements are not in a sequentially-descending order 

These are opportunities to improve keyboard navigation in your application.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)

Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).
